- **MINI PROJECT:**

Project Title: Analog meter using ardino

Project Area: In Electronics Labs

Project Description: Knowing the need of Errorless Output for Experiments in Labs, we are trying to build circuit using arduino which give negligible Error than common Analog meter.

- **FINAL YEAR PROJECT:**

Project Title: Secured data transmission using cloud services

Project Area: In Electronics Labs

Project Description: Knowing the need of secured data a Embedded system was developed where data was transferred from one pendrive to another pendrive without computer and during transfer , data was being stored on Cloud. By avoiding need of software, for which data gets free from virus. As data is being stored on cloud , access to data can be done from anywhere in the world.
